Provision is made for current income tax based on the tax liability computed after considering tax allowances & 59 exemptions.

From the Assessment Year 2008-09, the Company is subject to provisions of Minimum Alternate Tax. Credit for the advance Minimum Alternate Tax paid during the year by the Company is accounted for in accordance with the Guidance Note – 'Accounting for Credit Available in respect of Minimum Alternate Tax under The Income Tax Act 1961' issued by the Institute of Chartered Accountants of India (ICAI)

Deferred tax assets and liabilities are recognized for future tax consequence attributable to timing difference between taxable income and accounting income that are capable of reversing in one or more subsequent periods and are measured at relevant enacted / substantively enacted tax rates. At each balance sheet date, the Company reassesses unrealized deferred tax assets to the extent they become reasonably certain or virtually certain of realization, as the case may be.

#### J. Impairment of Assets

At each Balance Sheet date, the Management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing the value in use, the estimated future cash flows expected from the continuing use of the asset and from its ultimate disposal are discounted to their present values using a pre-determined discount rate that reflects the current market assessments of the time value of money and risks specific to the asset.

An impairment loss is charged to the Profit and Loss Account in the year in which an asset is identified as impaired. An impairment loss recognized in prior accounting periods is reversed if there has been a change in the estimate of the recoverable amount.

#### K. Provisions, Contingent Liabilities and Contingent Assets

As per Accounting Standard 29, 'Provisions, Contingent Liabilities and Contingent Assets', issued by the Institute of Chartered Accountants of India, the Company recognizes provisions only when it has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation as and when a reliable estimate of the amount of obligation can be made.

No Provision is recognized for:

- Any possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company; or
- Any present obligation that arises from past events but is not recognized because i. It is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or

These are assessed periodically and only that part of the obligation for which an outflow of resources embodying economic benefits is probable, is provided for, except in the extremely rare circumstances where no reliable estimates can be made.

Contingent Assets are not recognized in the financial statements since this may result in the recognition of income that may never be realized.

At each balance sheet date, the Company reassesses unrealized deferred tax assets to the extent they become reasonably certain or virtually certain of realization, as the case may be.

#### J. Impairment of Assets

At each Balance Sheet date, the Management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. Recoverable amount is the higher of an asset's net selling price and value in use. In assessing the value in use, the estimated future cash flows expected from the continuing use of the asset and from its ultimate disposal are discounted to their present values using a pre-determined discount rate that reflects the current market assessments of the time value of money and risks specific to the asset.

An impairment loss is charged to the Profit and Loss Account in the year in which an asset is identified as impaired. An impairment loss recognized in prior accounting periods is reversed if there has been a change in the estimate of the recoverable amount.
